Sanitary Ware

Raw materials

Good raw materials can produce good products. Our company mainly purchases high-grade raw materials, laying a good foundation for finished products.

Products

The product from the original soil to finished products need to go through 24 processes, finished products out, but also through three quality inspection procedures. Our company mainly aims at quality and service.

Factory General

By adopting the world first-class high pressure molding equipment, the comprehensive production efficiency has been increased by 4 times. By utilizing the digit control tunnel kiln, the firing temperature is strictly controlled over 1200 degree, which ensuring the water absorption rate of each product below 0.2%; the inspection of toilet pan is more strict. Each toilet is not only being tested on appearance, fixing ,flushing and PP/PE sewage function, but also has to pass the rigorous water leak test.

Mold

Our company mainly adopts high-voltage dies for mass production, with high output, good molding and high quality.

Flushing SYSTEM

In addition to the functionality and view, clean is provided to satisfy people's pleasure to use, let people feel life is wonderful. Simple line design is convenient for cleaning also have the idea of fashion. Joson Rimless Toilet is designed entirely without a flush rim. There are therefore no hidden, hard-to-reach places where bacteria can build up and odor can develop. Because Joson Rimless Toilet is much easier to clean, they are the first choice when it comes to toilet hygiene.

Joson Rimless Toilet feature a patented flush technology developed by Joson. A flush guide ensures a hygienically perfect flush every time using less water.

No flush rim—nowhere for germs to hide. Without a flush rim, there is no hidden, hard-to-reach places where germs, bacteria, dirt and deposits can accumulate.

Easy to clean. A clean and sparkling ceramic surface with one wipe.

1. Five accessories: Part A, B, C, D, E;

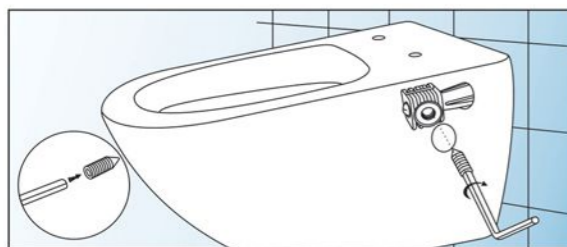

2. Fix the Part B into the screw as the above picture;

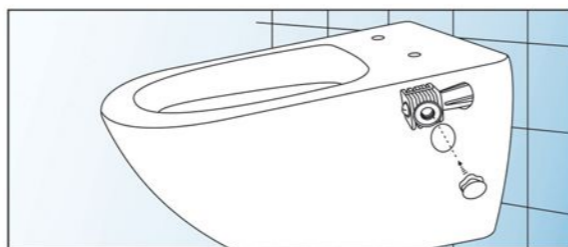

3. Put Part C into the installing hole on the pan;

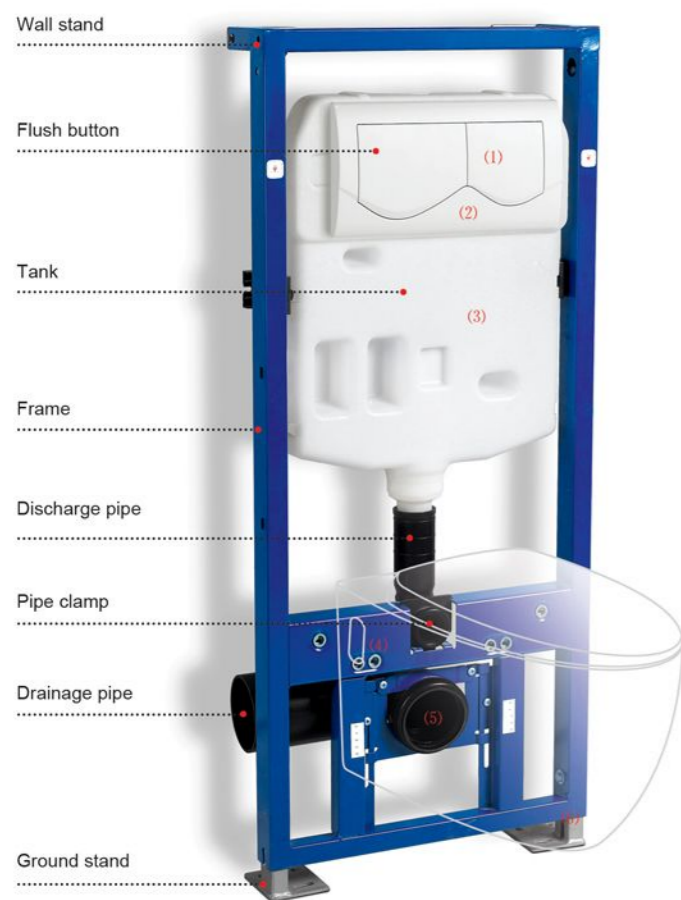

4. Insert the Part C into Part B;

5. Fix Part D into the hole on Part C by tool Part A;

6. Cover Part E on the hole of the pan

- (1) The fill valve can be easily installed, removed, and maintained.
- (2) Dual flush at 6/3 liters, saving water
- (3) EPS casing, highly efficient in reducing noise, isolating heat and preventing fogging and frosting.
- (4) Three sets of mounting holes, compatible with numerous types of toilet seats.
- (5) The pipe clamp is adjustable, making it suitable for installing numerous types of toilet seats.
- (6) The mounting height of the frame is adjustable, making it suitable for the needs of different households.
